Experience

Aide Business Solution (October 22 - January 23)
Completed a 2-month internship and worked as a front-end developer for 1 month. Gained extensive knowledge in HTML, CSS, JavaScript, React, Redux, and TypeScript by developing an e-commerce website and a governmental task management system. Contributed to the successful completion of both projects and gained valuable experience working in a team environment.

Skills

Expertise: HTML, CSS, Bootstrap, Tailwind, Daisy UI, JavaScript, React.

Comfortable: Redux, Firebase Authentication, TypeScript, NextJs, Material UI.

Familiar: Node JS, Express JS, MongoDB.

Languages

Bengali (Native) English (Comfortable)

Projects

Tm Tool   Live Site | Client-side code | server-side code

Tm Tool is a beautiful web app for managing team works.

● One can register as an admin and will create the members' profiles for his teammates. He can create multiple teams, assign tasks to the members, and make opinions about his team members.

● The member will sign in with the user ID and password provided by the admin. He will either update the task or forward it to the admin.

● React JS, Tailwind CSS, Daisy UI, Firebase Authentication, Redux, React Data-Table, etc are used to build the front end and, Express and MongoDB are used for the backend.

Connect   Live Site | Client-side code

A fine and simple real-time chat application.

● In order to use the app, users must register and create an account. To connect with friends, users can search for them using their email addresses.

● The application is built entirely on the front end, utilizing technologies such as React, TypeScript, Tailwind, and Firebase.
